

GENDER PAY GAP REPORT

Since April 2017, all UK companies with more than 250 employees have been required to publish calculations showing the pay gap between their male and female employees. The report allows companies to understand the size and cause of their gender pay gap and to address any areas of concern. A gender pay gap can be present for many reasons: for example, if an organisation has more males in senior roles than females.

Playnation, part of Inspired, supports the UK government's leadership in gender equality, and the requirement for companies to publish their data. We will continue to work with the government and best practice guidance to monitor and devise initiatives with an aim to narrow the gender pay gap within Inspired.

Playnation, part of Inspired, is reporting data from a snapshot taken in April 2020. During this time, only 5 people were on full pay, the remainder were on furlough, so they fall outside the scope of this report. Also, this snapshot does not reflect the company Inspired Gaming. (UK) Ltd that acquired Playnation in October 2019, since Playnation had not been incorporated into Inspired at the time of this report. Thus, we believe this report holds little value in assessing Playnation's or Inspired's gender pay gap. We have commissioned Cendex, a reward analytics company, to review our current organisation against the Gender Pay Gap criteria at full pay to give us a better view of our combined organization since the integration and allow us to accurately pinpoint areas of improvement. Watch this space for further information

What is a gender pay gap and how is it calculated?

"Gender pay gap" is the difference in the average hourly rate of pay between all men and all women in a company. It is important to note that gender pay gap is different from "equal pay," which refers to the difference in pay between men and women who carry out the same or comparable jobs. We want to be very clear that at Inspired, women and men in like-for-like roles are remunerated equally.

The "median" is the "middle" value in the list of numbers. If all company colleagues lined up in a female line and a male line, in order of pay from highest to lowest, the median gender pay gap compares the pay of the female in the middle of their line to the pay of the middle man. By contrast, the "mean" is the "average," whereby you add up all the numbers and then divide by the number of people.

Playnation part of Inspired's Workforce

At the time of this report, Playnation part of Inspired was not fully integrated into Inspired Gaming. (UK) Limited. Outside of Inspired Entertainment, Playnation's gender pay gap is 100%, since Playnation had no female employees on full pay at the time of this report. No women were represented in Playnation part of Inspired's workforce (total company split 100% male, 0% women) at the time of this report.

Gender Pay Gap

Difference between men and women	Mean Average	Median Middle

Our continued commitment

We look to encourage gender balance throughout our organization through our HR processes, as well as our social responsibility to advocate for greater gender equality in our marketplaces and wider society. Inspired recognizes the positive impact of taking proactive steps to supporting greater gender balance throughout our operations and the communities where we operate.

Pay Quartiles

These graphs illustrate the percentage of males and females in each pay quartile band is:

Includes all employees whose standard hourly rate places them in the upper quartile

Male: 100%
Female: 00.0%

Includes all employees whose standard hourly rate places them in the upper middle quartile

Male: 100%
Female: 00.0%

Includes all employees whose standard hourly rate places them in the lower middle quartile

Male: 100%
Female: 00.0%

Includes all employees whose standard hourly rate places them in the lower quartile

Male: 100%
Female: 00.0%
